PROFESSIONAL SUMMARY

Growth & Monetization PM with 4+ years building commercial infrastructure at scale — offers platforms, ML-powered targeting, and merchant monetization. At PhonePe (350M+ MAU), ran a ₹1000+ Cr marketing engine and acquired 5,000+ B2B merchants; outcomes include 22% checkout conversion lift, 32% marketing burn reduction, and 35% AOV uplift.

EXPERIENCE

Product Manager

May 2023 – Present

PhonePe · Consumer Offers & Growth Platform

- PhonePe's offers stack was fragmented across 350M+ MAU, with low redemption and poor checkout drop-offs; took ownership of the end-to-end offers-to-checkout product and redesigned offer placement, eligibility surfacing, and redemption UX — delivering a 22% lift in checkout conversion.
- With ₹1000+ Cr/yr marketing budget spent on static, rule-based targeting, led deployment of Propensity-to-Transact ML models replacing manual cohorts with real-time user-level propensity scoring — cutting marketing burn by 32% while sustaining GMV growth.
- Pincode (quick commerce vertical) faced 60%+ cart abandonment and flat AOV; built a dynamic cart incentivization engine with context-aware triggers tied to cart value, user intent, and time signals — achieving 35% AOV uplift, 60% cart abandonment reduction, and 20% improvement in 30-day retention.

Associate Product Manager

Apr 2022 – Apr 2023

PhonePe · Third-Party Rewards & Merchant Growth

- Inherited a ₹100 Cr/yr rewards portfolio distributed through static, non-personalized rules; rebuilt it into an ML-driven marketplace ecosystem with audience segmentation and brand self-serve tooling, onboarding 500+ brand partners — driving 11% YoY revenue growth and 26% increase in user engagement.
- CAC was high and merchant onboarding took 2 days due to manual processes; built a zero-to-one multi-tenant referral engine and self-serve PG integration platform — acquiring 5,000+ B2B merchants, cutting onboarding TAT to 30 minutes, and driving 5Mn+ new users/month at 23% lower CAC.

Product Manager — Founding Team (Intern)

Apr 2021 – Jun 2021

Kotak Mahindra Bank

- Joined the founding team pre-launch for Kotak Cherry (WealthTech app) with no existing product or user base; led UX research, scoped the MVP feature set around asset allocation and goal tracking, and co-owned the GTM — driving 100K+ downloads in the initial launch window.
